Book Description

Book Title

Beyond UFOs: The Science of Consciousness and Contact with Non-Human Intelligence

Summary of the Book

The Dr. Edgar Mitchell Foundation for Research into Extraterrestrial and Extraordinary Experiences, or FREE is a registered 501c3 academic research institute that is comprised of 11 retired Ph.D. academics and lay researchers exploring "**What is Consciousness**" by undertaking cross comparative research on individuals that have had contact with Non Human Intelligence (NHI) via the "**CONTACT MODALITIES**" (contact via perceived UFOs, NDEs, OBEs, Remote Viewing, Channeling, Ghosts/Spirits, Hallucinogenic Journeys, Orbs, PSI Contact, etc).

The FREE organization is not a Ufology organization. Instead, our mission is to explore the possible nature of "Consciousness" by conducting comprehensive academic research on the various extraordinary experiences within the Contact Modalities. The majority of the FREE Board of Directors, including the late Dr. Edgar Mitchell, believe that the field of what we know as "Ufology" is a very limited paradigm to understand what is really happening with "UFO Contact" because it is primarily focused on a rudimentary "Nuts & Bolts" approach. Dr. Mitchell firmly believed that the "Experienter" of contact with non human intelligence is the "Key" that will open the door towards understanding "What is Consciousness and Contact with NHI". FREE hypothesizes that a cross comparative research of "Experiencers" of the Contact Modalities may provide insight into the validity of various models of consciousness. Once the cross comparative research has been undertaken among the various Contact Modalities, numerous commonalities will be derived that are shared between all of these experiences. All of the variables identified by all of the Experiencers of the various

Contact Modalities can then be utilized in trying to develop a viable hypothesis for a "Unification Theory of Consciousness and Contact with NHI".

In addition, FREE hypothesizes that all of these Contact Modalities are in fact one phenomenon and should not be studied as separate phenomena which is the modus operandi of the research organizations associated with these fields. This is a limited "stove pipe" approach that does not recognize the numerous commonalities shared by each of these Contact Modalities. Many researchers such as ESP Researcher Dr. Dean Radin, NDE researcher Dr. Kenneth Ring, UFO researcher Dr. Jacques Valle, academic astrophysicist Dr. Rudy Schild, Princeton trained Ph.D. Physicist Dr. Claude Swanson, Ph.D. Neuroscientist Dr. Bob Davis, retired Ph.D. academic Dr. Jon Klimo, paranormal/UFO researcher Dr. John Alexander, paranormal researcher Brad Steiger, and even the late Dr. Edgar Mitchell, and so many others, have publicly expressed that there is a possibility that ALL of these "paranormal contact phenomena" might in fact be one phenomenon being expressed via different modalities.

The majority of our FREE Board of Directors hypothesize that all of these Contact Modalities are interconnected through what is commonly called Consciousness and that advanced physics, in particular, the Quantum Hologram Theory of Physics and Consciousness (QHTC), as developed by the late Dr. Edgar Mitchell, one of FREE's Co-Founders, can possibly begin to provide a rudimentary understanding how all of these diverse paranormal "Contact Modalities" are interrelated. The QHTC and two corollary models, the Magnetic Eternally Collapsing Object (MECO), as articulated by FREE Executive Director Dr. Rudy Schild, and the Synchronized Universe Model (SUM) developed by Dr. Claude Swanson, a member of the FREE Board of Director's, attempt to provide a physics-based scientific explanation to the nature of our reality, "paranormal contact experiences" and non-ordinary states of consciousness. Combined, the QHTC, MECO and the SUM Models, suggest that we might live in a multi-dimensional reality and, within this construct, humans are having contact with NHI in multiple formats, or "Contact Modalities." Each of these three physics based Consciousness models will be prominently featured in our book under the section titled: ***What is the Relationship Between Consciousness and Contact?***

FREE also acknowledges that there are limitations to a purely physics-based approach to the understanding of Consciousness and a possible "Unified Field Theory of the Paranormal Contact Modalities". To this end we will also be presenting 3 additional articles, written by Dr. Jon Klimo, Giorgio Piacenza, and Rey Hernandez that will provide additional epistemological models of

Consciousness integrating physics, philosophical, and spiritual based arguments of “Consciousness and Contact.” These integrative theories incorporate the role of consciousness, spirituality and paranormal phenomena and may be viewed as additional components of a possible “Unified Field Theory of the Contact Modalities.” Eventually, FREE plans to add to this model the comparative data findings from our future academic research study on ALL of the Contact Modalities which we believe is the necessary ingredient that might aide us to begin to solve this complex riddle of “What is Consciousness and Contact”.

The next section of our book is titled ***The FREE Experiencer Research Study***. We decided to commence our research on the Contact Modalities on the phenomena of UFO related contact with NHI, instead of one of the other Contact Modalities, for the simple fact that there was minimal academic research on this topic. Even though there was much literature in this field, almost all of it was filled with thousands of anecdotal INDIVIDUAL case histories of individual experiences. No one had undertaken a systematic comprehensive quantitative and qualitative academic research study, in multiple languages, in multiple counties, on this topic. There have been small statistical studies, but these were limited to less than 50 participants and the topic questions were always limited to limited topic areas, such as the “abduction scenario” and the surveys were comprised of less than 50 questions. The candidates were also self selected which biased the data results. Therefore, in order to undertake a cross comparative analysis of the Contact Modalities, we needed to first establish a scientific statistical baseline to truly understand the UFO related contact Phenomena.

FREE is in the process of completing the first comprehensive multilingual international research study on individuals that have had UFO related contact with NHI. The FREE Experiencer Research Study is comprised of 4 Phases. Phase 1 and 2 are comprised of two quantitative surveys totaling almost 600 questions. Phase 3 is our qualitative survey instrument comprised of written responses to 70 open ended questions. Phase 4 will be formal interviews with selected survey participants. To date, over 3,500 subjects have participated in our English Language Phase 1 survey from over 110 different countries. We also have our surveys running in Spanish, German, French, Slovak, and soon in Cantonese Chinese.

The section of our book titled ***The FREE Experiencer Research Study*** will have two academic articles. The first is a statistical analysis of the Phase 1 and 2 data from our FREE Experiencer Research Study. This academic paper will soon be published in the Journal of the Society for Scientific Exploration, with 6 of

FREE's academics as co-authors. The second academic research article contained in this section is being authored by retired university professor, and FREE Co-Chair, Dr. Jon Klimo, who is taking the lead in analyzing our Phase 3 qualitative research data. Dr. Klimo is in the process of completing this academic research article which will be submitted to a suitable academic journal in the very near future.

The third section is titled *Thematic Chapter Topic Areas*. This section will contain 12 separate chapters, each focusing on a specific thematic topic area. Each of these topic chapters will focus on the data results for each topic area from our FREE Experiencer Research Study. We will focus on the following topics: Psychological Transformation; Spiritual Transformation; Medial Healings; Similarities between UFO Contact and NDEs and OBEs; Messages received from NHI; Telepathic Downloads of Science, Physics, and Technology; Ecological Messages Received from NHI; Kundalini Experiences of UFO Contact Experiencers; and to address the question if the Experiencers consider themselves to be Abductees or Contactees.

The next section is our *Conclusion* which will be written by the world's most renowned authority on "Paranormal Contact", Brad Steiger. Brad Steiger has written over 175 books with over 17 million copies in print, and has written more than 2,000 paranormal themed articles. He indeed is the world's most respected expert on the similarities between the Paranormal and UFO related contact with Non Human Intelligence.

SUMMARY

FREE'S NEW BOOK. "***BEYOND UFOS: THE SCIENCE OF CONSCIOUSNESS AND CONTACT WITH NON HUMAN INTELLIGENCE***". After 4 years of conducting the world's first comprehensive multi-language and international academic research study on UFO related Contact with Non Human Intelligence (NHI), The FREE Foundation will finally be publishing its historic new book in April of 2018. The Dr. Edgar Mitchell FREE Foundation for Research into Extraterrestrial and Extraordinary Experiencers, or FREE, a 501c3 academic research foundation, comprised of 11 Ph.D. physicists, scientists, neuroscientists and lay researchers, will be publishing a book analyzing the data of our FREE Experiencer Research Study. We will have more than 21 authors writing 22 chapters on the historic findings which totally contradict much of what is circulating in the field of Ufology. This book will soon be the authority for UFO related contact with NHI. This historic research will establish a new paradigm for viewing the phenomena of UFO Contact with NHI, not by associating it with UFOs, but by associating it via Consciousness and the Contact Modalities (contact via UFOs, NDEs, OBEs, Spirits/Ghosts, Channeling, Remote Viewing, Orbs, Hallucinogenic Journeys, ESP, Telepathic Communications, etc). FREE hypothesizes that all "Paranormal" Contact with NHI is interrelated and might be one phenomenon instead of separate phenomena and that advanced theories of "Consciousness" can begin to reveal this relationship. FREE also believes that cross comparative research on the "Experiencers" of the Contact Modalities is the key to understand the mystery of what is Consciousness-- what is the true nature of our reality. Please read the attached Book Description and the famous authors that will be discussing our FREE data and writing groundbreaking articles on our FREE Experiencer Research Study.
